

Stop-Loc[®] New Hand Lathe Tool

The only adjustable front collet/chuck stop in the World!

Original Stop-loc[®]

Fits any size stock up to 3" Diameter

Deluxe Stop-loc[®]
with Dual Ruler in
Decimal/Metric

Save A Fortune

No more fixed length dedicated shop-made front collet stops for each job.

Adjustable Precision

Gage lengths up to 5½" long holding +/- .005. Longer models are available.

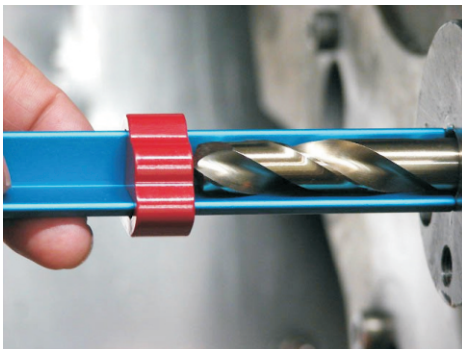

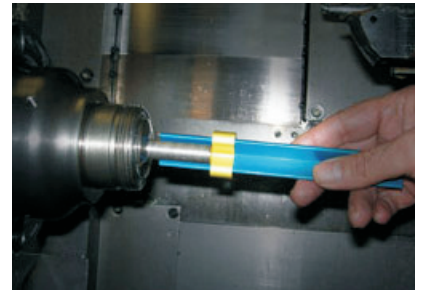

Versatile

This tool is indispensable when using cnc or manual lathes whether you're running a bar manually through a collet/chuck or using a bar puller (first pull for each bar), and can be used on most stock shapes and sizes: round, square, hex, etc.

Consistency

The unique design incorporates the features of self-centering, unobstructed viewing and contrasting colors to give the user confidence by feeling and seeing that the dimension is being controlled. It's also a handy ruler for visual reference.

Quick and Easy to Use!

Now you can mill both sides of your stock with out a stop in the way!
